WEDNESDAY, May 11. All of the news bearing upon the progress of the war between this country and Spain that came to hand to-day was regarded by the apecu lative community as foreshadowing a speed; constalon of hostilities. This view, judging from the increased activity in the bond market and the wider distribution of the dealings to stocks, was doubtless also held by many in-vestors, both large and small. A feature of the stock market was the reappearance of a demand for fractional lots, that is, for amounts of less than 100 shares. It is also worth noting that for the first time since the international situation be came acute the Street has begun to attach impertance to developments specifically affecting the value of securities. There was more talk to-day about present and prospective railroad sarnings, about the outlook for various industrial enterprises, and about crop prospects generally than emjecturing as to campaign ogrammes and their probable outcome.

It is bardly necessary to recount the advices received, chiefly from abroad, that induced the financial centre of the country to give vent in the security market to an expression of relief based upon the conviction that Spain has practically determined to abandon her colonies, and that she will not indulge in aggressive warfare. These expectations were based, logically enough, upon the retrograde movement of the Spanish fleet, the decline in the premium en gold in Spain, the withholding of succor from the Spanish forces in Cuba, and the reported loan of \$20,000,000 through one of the European Government banks, either to the Bank of Spain or to the Spanish Government. London was rather slow in appreciating the circumstances enumerated, and in consequence the opening of the stock market was fractionally below the final figures of yesterday. The recession, however, was short lived. and before midday foreign arbitrage houses were ents as buyers of stocks. They and local traders day at considerably higher prices. There were indications also that some of the stocks on which important dealers took profits last week

The transactions in stocks were more than 25 went, larger than yesterday and nearly up to Monday's large total, while in bonds they were about 50 ♥ cent. larger than yesterday. The leader of the speculation in every respect was St. Paul common. The strength and activity of the market for that stock, though due partly to the recent creation of a large short interest in it, exerted a decided influence upon the entire speculation. The substantial basis for the improvement in St. Paul, name ly, excellent earnings, was appreciated by the dealers in the other Granger stocks, all of which scored noteworthy net advances. Atchison preferred was unusually active at net advance of nearly 2 points. The movement extended naturally to the lower priced shares, such as Chicago Great Western, Missouri Pacific, and Union Pacific and Northern Pacific common. Other stocks of this class that made good showings were Erie first preferred, C., C. C. and St. Louis, Baltimore and Ohio, Cleveland, Loraine and Wheeling and Colorado Fuel. With the ex ception of Consolidated Gas all of the gas stocks were strong at rapidly advancing prices People's Gas gained nearly 2 points and Laclede Gas, which was more exten-sively dealt in than for some time past, closed more than 2 points higher than yesterday. Both companies, as is well known, are steadily increasing their output and their receipts at constantly reduced cost of their products to consumers. The Laclede Company, it is stated, will pay a second dividend upon its common stock at the end of the current six months, thus placing it upon a 3 \$\pi\$ cent. basis. Activity in Baltimore and Ohio elicited the fact that the plan for reorganizing the company will be made public shortly. The first step toward readjusting the capitalization of the General Electric Company attracted some at-tention to the common stock of that corporation. An authoritative announcement that the Amer-ican Malting Company has earned a year's dividend upon its preferred stock during the first half of its fiscal year naturally directed attention to the common stock. The improvement in prices was well sustained through ut, and the closing was at about the best figares. Engagements of gold for import to-day were \$730,000, making the total of the present movement \$65,321,850.

The expected improvement in the realty business in this city has not been apparent to any large extent in the last few days. The attention of business men is now chiefly directed upon the proposed issue of Government bonds for meeting war expenses. Some of the largest money lenders on realty have curtailed their opers tions, preferring to keep their funds intact in order to help the Government to the full extent of their resources. This has made loans difficult to secure at the moment, and now they are only made at 4 g and 5 per cent, interest, chiefly at the made at 4½ and 5 per cent, interest, chiefly at the latter rate. This temporary stringency of the money market has had a chilling effect on anotion sales, and many properties are being withdrawn on this account.

Within the next sixty days, however, an amount approximating \$100,000,000 will be paid out by the large corporations and financial institutions of the country in the shape of semi-annual interest and dividends, and this should afford ample funds to enable the builder and real estate operator to make new business ventures in this line at an early date.
